

Listing of the Claims:

1. (Original) A drop pill comprising the pharmaceutical active ingredient and at least one of the pharmaceutically acceptable matrix adjuvants selected from a group consisting of monosaccharide, oligosaccharide, polysaccharide, sugar ester, sugar alcohol, alpha-hydroxy acid, higher fatty acid derivative, higher aliphatic alcohol, polyol, urea, and poly(ethylene oxide) derivative.

2. (Original) The drop pill according to claim 1, wherein said pharmaceutical active ingredient is a extract of crude drug.

3. (Original) The drop pill according to claim 1, wherein said pharmaceutical active ingredient is a chemically synthesized drug, antibiotic or biochemical drug.

4. (Currently amended) The drop pill according to ~~any one of~~ claims 1, wherein as the matrix adjuvants, said monosaccharide is D-ribose, fructose, glucose, or xylose; said oligosaccharide is trehalose, raffinose, or maltose; said polysaccharide is gelose; said sugar ester is sucrose ester, or D-ribonic acid- γ -lactone; said sugar alcohol is erythritol, sorbitol, xylitol, arabitol, isomaltitol, or lactitol; said alpha-hydroxy acid is malic acid, or citric acid; said higher fatty acid derivative is sodium stearate, glycerin stearate, glycerin palmitate, or shellac; said higher aliphatic alcohol is cetyl alcohol, or stearyl alcohol; said polyol is phenyl ethanediol; said poly(ethylene oxide) derivative is polyoxyethylene monostearate, or polyoxyethylene alkyl ether, and wherein the above-mentioned compounds containing crystal water.

5. (Currently amended) The drop pill according to ~~any one of~~ claims 1, wherein said matrix adjuvant is at least one of natural adjuvants derived from plants which are selected from a group consisting of the following: sorbitol, xylitol, lactitol, maltose, sucrose ester, and the above-mentioned compounds containing crystal water.

6. (Currently amended) The drop pill according to ~~any one of~~ claims 1, wherein said drop pill further comprises at least one of plastifying components selected from a group consisting of the following: starch and their derivatives, cellulose and their derivatives, arabic gum, dextran, chitin, sesbania gum, carrageen gum, Indian gum, danish agar, tragacanth gum, carrageenin, tamarind gum, pectin, xanthan gum, alginic acid and the salts thereof, dextrin, cyclodextrin, agar, lactose; polyvinylpyrrolidone, cross-linked polyvinylpyrrolidone, carbomer, polyvinyl alcohol, acrylic acid resin, poloxamer, silicon dioxide, glutin, glycerin monostearate, polyoxyethylene monostearate.

7. (Original) The drop pill according to claim 6, wherein said plastifying component is one or more substances selected from a group consisting of the following: pregelatinized starch, carboxymethyl starch, methyl cellulose, sodium carboxymethyl cellulose, hydroxypropyl methyl cellulose, arabic gum, alginic acid, dextrin, cyclodextrin, agar, lactose, glycerin monostearate, polyoxyethylene monostearate, cross-linked sodium carboxymethyl cellulose, silicon dioxide.

8. (Currently amended) The drop pill according to claim 6, wherein said matrix ~~matrixe~~ adjuvant includes lactitol and starch.

9. (Previously presented) The drop pill according to claim 6, wherein said matrix adjuvant includes xylitol and arabic gum.

10. (Previously presented) The drop pill according to claim 6, wherein said matrix adjuvant includes sucrose ester and glycerin monostearate or polyoxyethylene monostearate.

11. (Previously presented) The drop pill according to claim 6, wherein said matrix adjuvant includes sucrose ester, polyoxyethylene monostearate and cross-linked sodium carboxymethyl cellulose.

12. (Previously presented) The drop pill according to claim 6, wherein said matrix adjuvant includes sucrose ester, polyoxyethylene monostearate, cross-linked sodium carboxymethyl cellulose and silicon dioxide.

13. (Original) The drop pill according to claim 1, wherein the weight ratio of the matrix adjuvant to the pharmaceutical active ingredient is in the range of 1:0.1~1:1.

14. (Original) The drop pill according to claim 1, wherein the weight ratio of matrix adjuvant to the pharmaceutical active ingredient is in the range of 1:0.1~1:0.6.

15. (Withdrawn) A matrix adjuvant for drop pill comprising xylitol and starch with the weight ratio of 1:0.2~1:0.3.

16. (Withdrawn) A matrix adjuvant for drop pill comprising lactitol and starch with the weight ratio of 1:0.2~1:0.3.

17. (Withdrawn) A matrix adjuvant for drop pill comprising xylitol and arabic gum with the weight ratio of 1:0.2~1:0.4.

18. (Withdrawn) A matrix adjuvant for drop pill comprising sucrose ester and glycerin monostearate or polyoxyethylene monostearate with the weight ratio of 1:0.1~1:1.

19. (Withdrawn) A matrix adjuvant for drop pill comprising sucrose ester, polyoxyethylene monostearate and cross-linked sodium carboxyl methyl cellulose with the weight ratio of 1:(0.1~1):(0.1~1).

20. (Withdrawn) A matrix adjuvant for drop pill comprising sucrose ester, the plastifying

components including polyoxyethylene monostearate, cross-linked sodium carboxymethyl cellulose and silicon dioxide with the weight ratio of 15:(7~15):(0.1~2):(0.1~2).
